

Job Opening: Fabrication Drawing / Detailing Engineer/Draftsman– 04 Positions

 **Location:** Varanasi

 **Industry:** Heavy Steel Fabrication & Structures

 **Experience Required:** 3–10 years in Structural Steel Drafting & Fabrication Drawings

Key Responsibilities

- Prepare **fabrication drawings, shop drawings, and GA drawings** for heavy steel structures.
 - Develop **assembly drawings, part drawings, and BOQs (Bill of Quantities)** from design inputs.
 - Ensure dimensional accuracy, weld symbols, bolt details, and cutting plans in all drawings.
 - Coordinate with **design, planning, and yard execution teams** for drawing clarifications.
 - Modify and update drawings based on **site / client feedback**.
 - Generate **NC files, cutting plans, and material take-offs** for the fabrication yard.
 - Maintain drawing records systematically (both **manual & digital formats**).
-

Qualifications & Skills

- **Diploma / ITI** in Mechanical / Civil / Drafting (or equivalent).
- Proficiency in **Auto CAD, Tekla, SDS/2, or similar detailing software**.
- Strong knowledge of **steel fabrication standards, codes, and industry practices**.
- Understanding of **welding symbols, tolerances, and material specifications**.
- Ability to **interpret structural design drawings** and convert them into detailed fabrication drawings.
- Strong communication and teamwork skills for effective cross-department coordination.
